

B)

Accepted

$$\begin{aligned}
 [BG] &= 1 \\
 [BC] &= 1 \\
 [CE] &= 1 \\
 [AH] &= 1 \\
 [AD] &= 2 \\
 [DF] &= 3 \\
 [AB] &= 4 \\
 [HI] &= \frac{5}{18}
 \end{aligned}$$

Rejected

$$\begin{aligned}
 [CG] &= 1 \text{ loop} \\
 [FH] &= 4 \text{ loop} \\
 [DC] &= 4 \text{ loop} \\
 [DE] &= 4 \text{ loop} \\
 [GE] &= 5 \text{ loop} \\
 [FE] &= 5 \text{ loop}
 \end{aligned}$$

All nodes are interconnected so ~~no~~
 no further edges need to be
 considered (step 3 in algorithm)

$$\text{length or cost} = 18$$

Find the shortest path between A and F

6	11
11	

0	1	1	0
---	---	---	---

4	7
7	

2 possible equal cost solutions are shown
 _____ or _____
